It provides basic doctrinal discussion on the organization and operations of Quartermaster general supply and field services units. The focus of Army techniques publication (ATP) 4-42 is operational and tactical level general supply and field services operations which are conducted in support of Army forces in a deployed environment. It discusses these functions through the various support levels of multi-functional and Quartermaster logistics units. From a supporting commander s perspective, it provides information on the functions of general supplies and field services to allow that commander to understand better how to execute support to the force. From a supported commander s perspective, it provides information on the types of support available in order to allow proper planning. ATP 4-42 contains seven chapters: Chapter 1 discusses the overall concept of support and describes the general supply and field services operational overviews. Chapter 2 focuses on the roles and missions of strategic partners, joint and multinational support, executive agency and proponentcy, the general supply and field services...
