In all cases of early cancer, the operative method is undoubtedly best; it is quicker, safer and offers the best prospect of cure. 3. In patients who refuse operation or are otherwise unfit for operation, radium is a useful remedy. The Roentgen-ray is believed to owe what efficiency it possesses to a ray corresponding to the gamma ray of radium, so that there seems to be no reason for preferring it to the latter (save its greater accessibility) since the curative rays are acknowledged to comprise only a small part of the whole Roentgen ray. In point of fact, the Roentgen ray cannot be regarded as a dependable agent in the treatment of epitheliomas, however useful it may be as a palliative or postoperative measure. The present evidence seems conclusive that operative measures are, in general, the safest means...
